Subtle Energies Workshop

The Subtle Energy Awareness Class is designed to bring awareness to all those who would like to discover the wonderment of the subtle, unseen ways of energy and life. When we talk about human energies, we go beyond the measurable electromagnetic aspects which are part of our physical functioning. We refer to the subtle energy systems that are connected to life force and reflect the state of our consciousness. We have three main systems of subtle energies: Meridians, Chakras and the Aura that consists of our subtle bodies.

From our perspective there is no separation between the systems. The physical and the subtle systems form one total integrated and interactive system that we call the "human energy system." For ease of discussion and understanding we talk of sub-systems. These subsystems are different ways we can approach the total human energy system for the purpose of healing, balancing, and raising vibrations. You will gain an understanding of your health, emotional balance, state of mind, and spiritual insight to their journey of life. You will be able people to think and feel differently about the happenings and experiences of your lives. This is a two (2) Day Course 12 hours

Questions that will be answered:

1. The Human Energy Field, its structure and how it flows
2. How energies are transmitted out from you and received by you
3. How you can help yourself every day with easy energy management
4. How we connect energetically to others in relationships
5. How to gain stronger, more vibrant energy for your emotional well-being
6. How to clear and focus your mind by applying energy principles

Your insight and knowledge will help you to understand your own challenges and potentials. This is your opportunity to enrich the lives of others. **Seating is limited call to reserve your seat at 813-770-2077.**

1. Class Maximum of 3 to 7 persons cost is $200.00
2. Small Class Maximum of 2 persons cost is $300.00
